

GemRack Release Notes - V1.0 Build 1038

The main purpose of this release (on 15-Oct-2019) is to improve the overall program useability and resolve any known bugs.

If you have an active *Support Subscription* we encourage you to install this new release and take advantage of all the latest enhancements and corrections and if you have an expired *Support Subscription* and wish to renew it please contact our office.

This update is available by clicking the pop-up that appears at the bottom of the screen when opening **GemRack** or via the **Menu bar > Help >  Check for Updates** function and following the prompts.

The main changes for this release include:

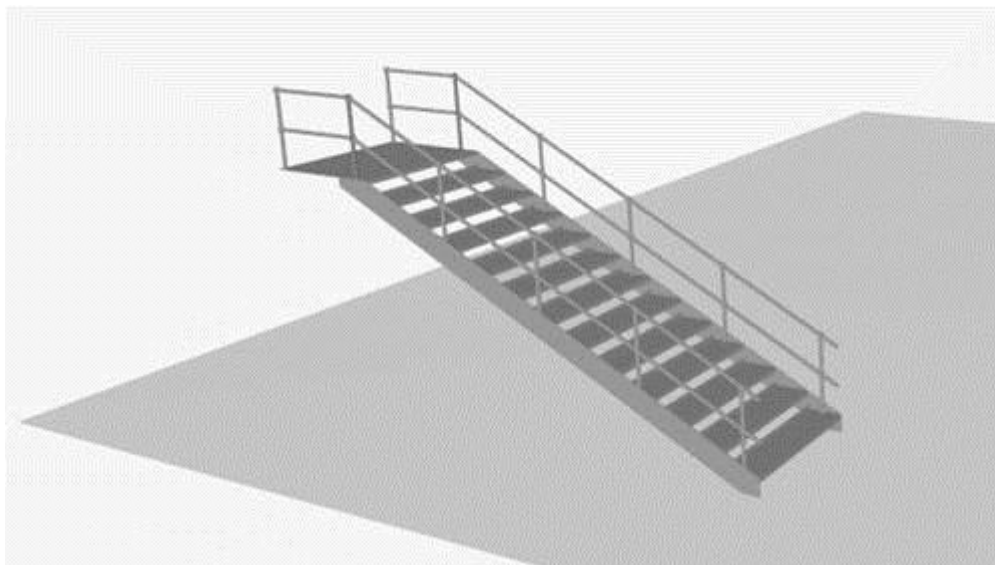

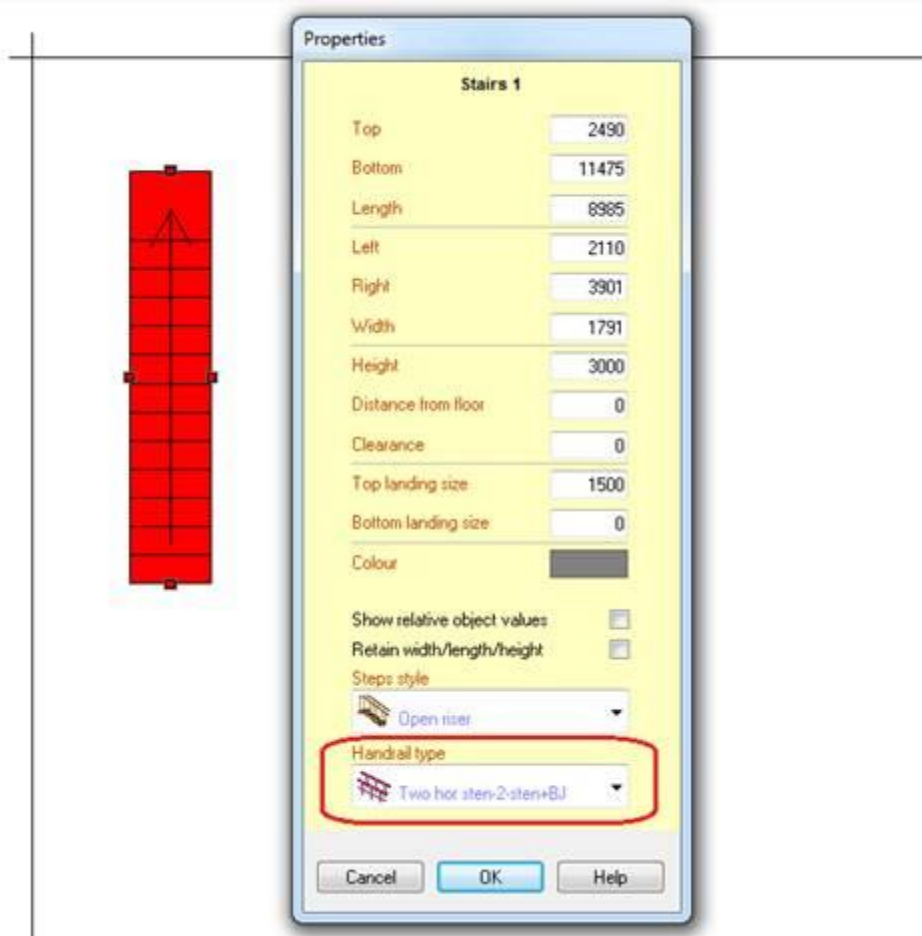

- enhanced the 'stairs' feature to include additional rail types,
- improved the way default file name is determined when saving projects,
- changed the way 'Apply to all bays' feature works for cantilever column braces and
- resolved various bugs related to frame braces in back-to-back elevations, undo function related to doors, copy/paste of distance markers and runs between projects, Tier/Frame & Cantilever Arm Settings dialogs in Run View.

New Features

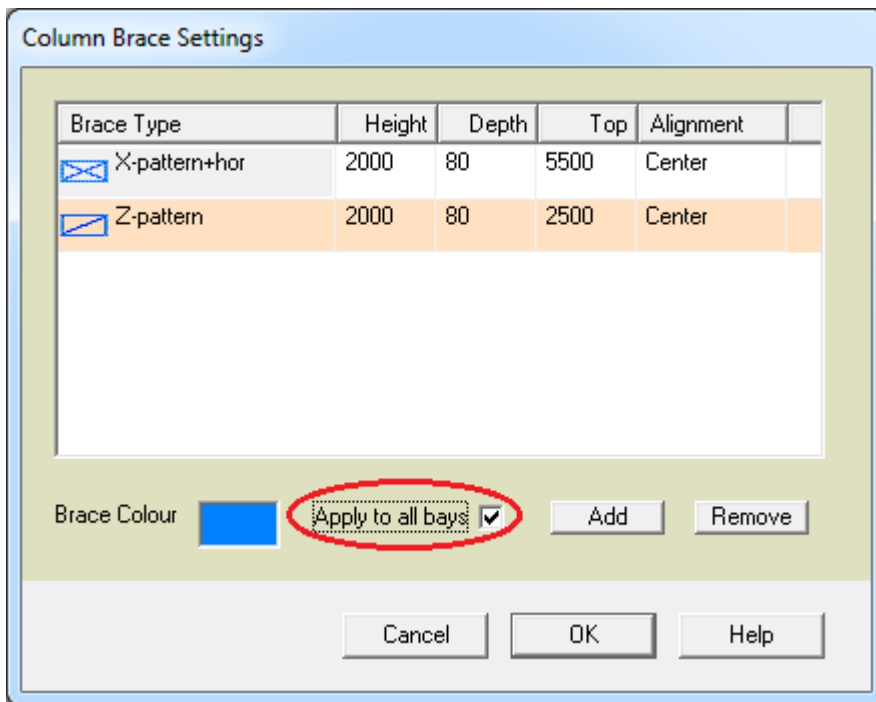

- None

Enhanced Features & Corrections

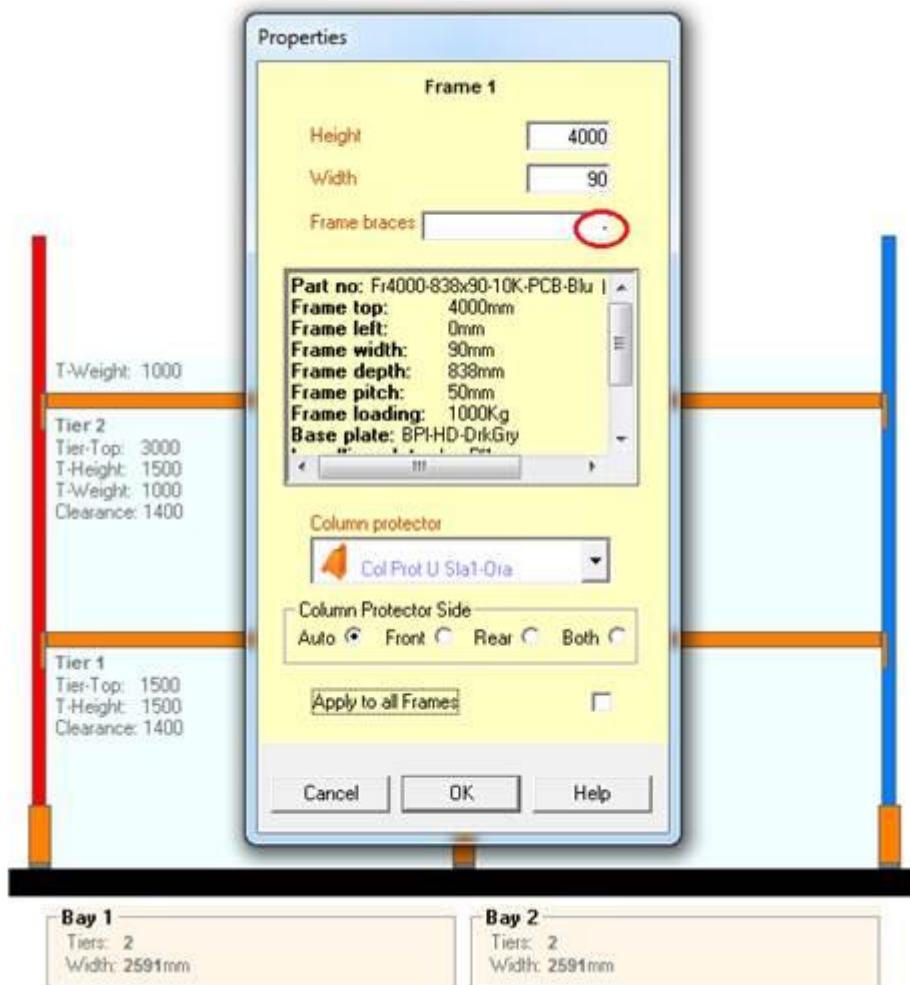

1. Enhanced the stairs feature to include additional rail types and resolved a bug related to duplicating of 'stairs' where the distance between the duplicated stairs for some directions is not calculated properly.

2. Modified the way Run View function that updates cantilever column brace settings when 'Apply to all bays' is checked.

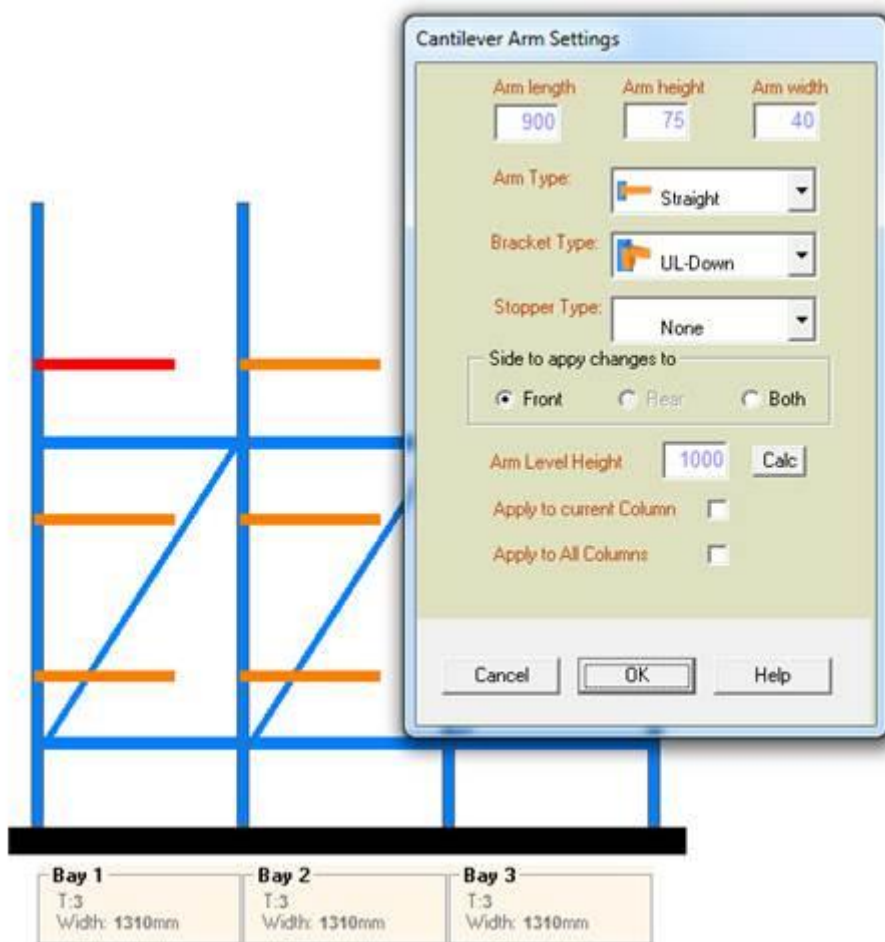

3. Improved the way default file name is determined when saving a project file as well as saving of a floor plan drawing.
4. Resolved a bug related to properly showing frame braces for back-to-back elevations in floor plan drawings.
5. Resolved a bug related to undo function and doors on walls, where they're sometimes not properly oriented.
6. Resolved a bug related to loading and pasting of distance markers where sometimes the colour and font size are not properly copied.
7. Resolved a bug related to Copy/Paste of runs from one project to another if the frames are using 76.2mm pitch.
8. Resolved a bug in Run View if Tier dialog is opened and nothing changed except for the 'Apply to all Bays' checkbox.
9. Resolved a bug in Run View where frame braces disappear if '-' character is inserted to the 'Frame braces' field and applying the change to all frames.

10. Resolved a bug related to beam colour field when closing the Beam Properties dialog.

11. Resolved a bug when closing Cantilever Arm Settings dialog in Run View.

12. Resolved a bug related to button positioning in floor plan drawing window for tablets.
13. Resolved a bug related to showing of the Parts Lists.
