

GemRack Release Notes - V1.0 Build 1054

The main purpose of this release (on 04-Jun-2021) is to improve the overall program useability and resolve bugs.

If you have an active *Support Subscription* we encourage you to install this new release and take advantage of all the latest enhancements and corrections and if you have an expired *Support Subscription* and wish to renew it please contact our office.

This update is available by clicking the pop-up that appears at the bottom of the screen when opening **GemRack** or via the **Menu bar > Help >  Check for Updates** function and following the prompts.

The main changes for this release include:

- fixed several bugs related to validation of fields in the 'properties' dialog,
- fixed a bug in Run View related to switching from one run to its shadow run,
- fixed a bug related to creation of distance markers and pillars,
- fixed a bug related to the floor plan drawing and 3D feature,
- enhanced the mezzanine feature to make it easier to create handrails.

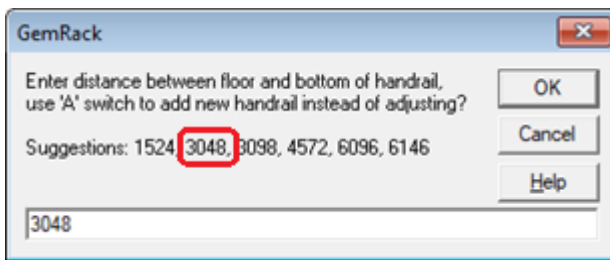

New Features

None.

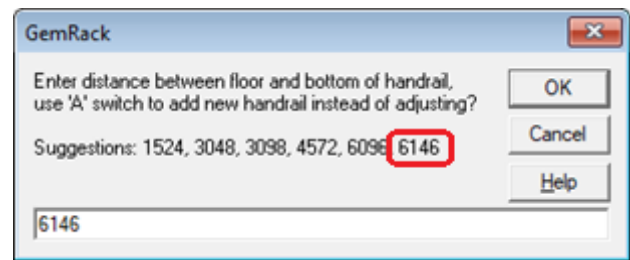

Enhanced Features & Corrections

1. Fixed several bugs related to validation of fields in the 'fixture properties' dialog, when under certain circumstances user enters non-numeric values.
2. Fixed a bug in Run View that sometimes occurred when switching from one run to its shadow.
3. Fixed a bug related to creation of distance markers and pillars in Top View that sometimes occurs.
4. Fixed several bugs related to the floor plan drawing and 3D feature.
5. Made some changes to underlying data in preparation for planned enhancements in the future.

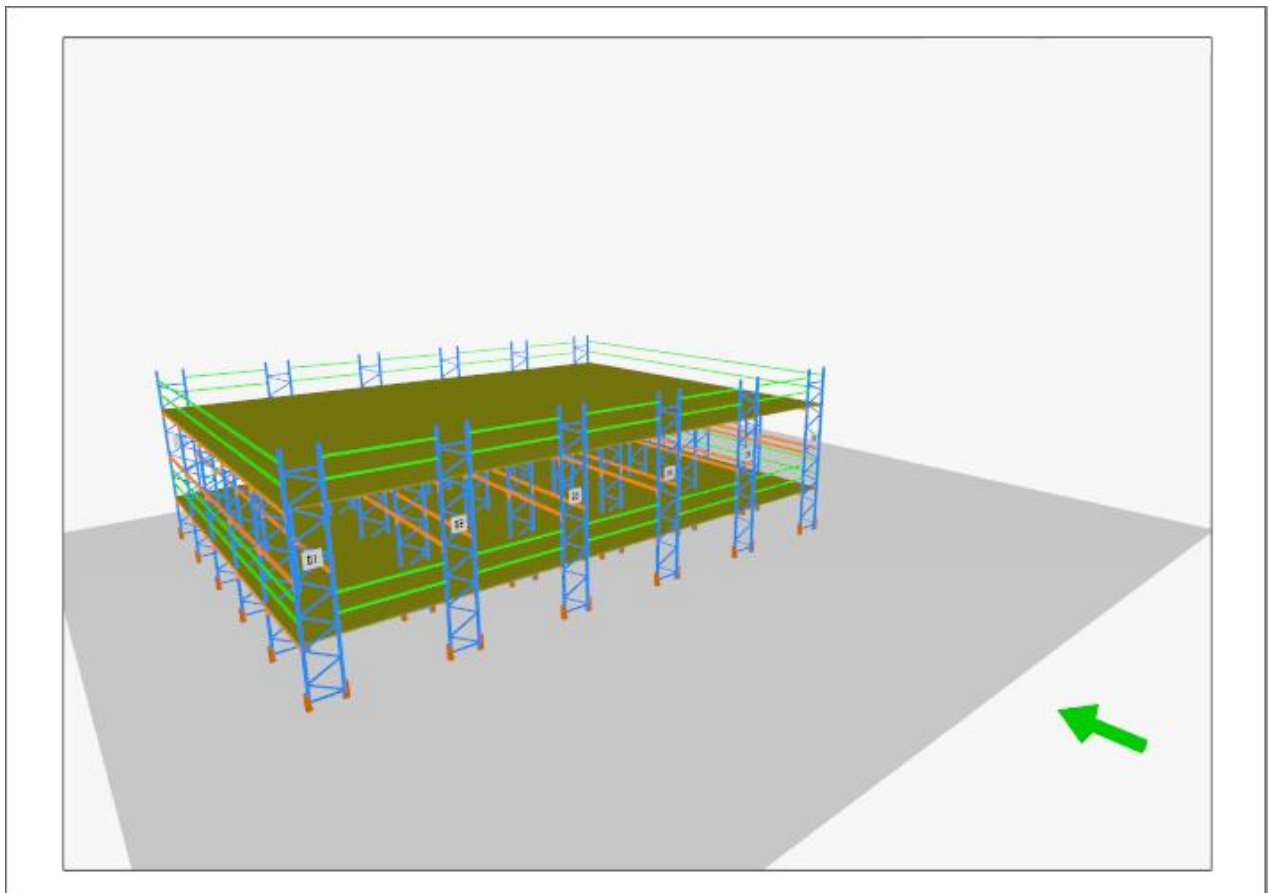

6. Enhanced the mezzanine feature to make it easier to create handrails (when creating multiple levels) by showing user distance from floor of existing beams and decks.

This created top handrail

This created bottom handrail
