

GemRack V1.0 Build 1201 – Release Information

Release Date: 16 September 2026

GemRack V1.0 Build 1201 incorporates the cumulative development, enhancements and corrections made to GemRack since earlier generally distributed versions.

During this period, development has included improvements to existing functions, corrections to reported issues, reliability and compatibility changes, and a number of smaller usability enhancements throughout the program.

Some of the more significant areas of development include:

- improvements to object property validation and handling of invalid or out-of-range values;
- improvements to drawing presentation, including captions, distance markers and other drawing elements;
- enhancements and corrections to Top View, Run View and 3D-related functions;
- improvements to PDF creation and printer handling;
- improvements to project handling, program stability and error recovery;
- enhancements to Safety Audit and reporting functions;
- improvements to shared licence operation and licence management;
- numerous other corrections and minor usability improvements arising from ongoing development and client feedback.

Build 1201 also includes internal changes made in preparation for continuing development of GemRack.

Because Build 1201 represents the cumulative result of a substantial period of development, this document is intended as a **summary of the release rather than a detailed record of every individual change**.

More detailed release information will be provided for future GemRack releases, allowing changes introduced after Build 1201 to be documented progressively.

Updating GemRack

Where LiveUpdate is available, GemRack can be updated using **Help > Check for Updates** and following the prompts.

Alternatively, an updated installation package may be provided by Gem Business Solutions where appropriate.

Existing GemRack projects and catalogues are retained when installing an update in the normal manner.

Support

If you experience any problems following an update, or have questions regarding any of the changes, please contact Gem Business Solutions.
